DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment after final filed 3/21/2005. Claims 21, 27-28, 30, 38, 41, 45-46, 48, 53 and 56 have been amended; claims 29, 31-34, 37, 47 and 49-52 have been canceled. The specification has also been amended.
2. The objections to the drawing, the title, and claim 37 have been withdrawn. The rejection of claim 28 under 35 USC 112 has been withdrawn.

Allowable Subject Matter

3. Claims 21-28, 30, 35-36, 38-46, 48 and 53-58 are allowed.
4. The following is an examiner's statement of reasons for allowance. The present invention is directed to a method of generating a random number using an image generated by a fingerprint identification device, the image is generated when there is no fingerprint presented to the identification device. More specifically, independent claims 21 and 41 identify the uniquely distinct features: extracting the least significant bit of a predetermined number of grey scale pixels starting from a start address having the pixel value of one pixel selected to be the horizontal address and the pixel value of another pixel selected to be the vertical address of the start address. The closest prior art, Borza et al, discloses a method for generating a random number using white noises from an image captured by a fingerprint identification device. Another prior art, Nielsen,

discloses a random number generator generating a random number sequence by extracting the least significant bit of the grey scale pixel value of a predetermined number of grey scale pixels starting from a certain start address. However, Borza and Nielsen do not teach generating a start address having the pixel value of one pixel selected to be the horizontal address and the pixel value of another pixel selected to be the vertical address of the start address. The prior art, taken either singly or in combination, fails to anticipate or fairly suggest the limitations of applicant's independent claim, in such a manner that a rejection under 35 U.S.C 102 or 103 would be proper. The claimed invention is therefore considered to be in condition for allowance as being novel and nonobvious over prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Minh Dinh whose telephone number is 571-272-3802. The examiner can normally be reached on Mon-Fri: 10:00am-6:30pm.
